SUMMARY

Experience designer and design researcher exploring the intersection of spatial design, AI and immersive technologies to shape future human-environment interactions.

EDUCATION

National Institute of Fashion Technology, Mumbai 2025-Present

Master of Design

Bharati Vidyapeeth (Deemed to be University) College of Architecture, Pune 2018-2023

Bachelor of Architecture 8.22 CGPA

PROJECTS

Boolingo – AR Language Learning Experience

- Designed an immersive AR-based language learning system reimagining Duolingo using spatial interactions and storytelling.
- Explored user engagement and retention through contextual and interactive environments .
- Applied spatial UX principles to enhance usability and learning experience.

Real-Time Motion Tracking Application

- Designed an interactive system using real-time motion tracking to enable responsive user interactions.
- Explored body movement as an input medium to create intuitive and engaging user experiences.
- Investigated the relationship between physical gestures and digital feedback in immersive environments.

Eye-Gaze Motion Tracking Application

- Designed an interactive application using eye-gaze tracking to enable responsive, hands-free interaction in museum environments.
- Explored gaze as an input modality for art mediation, connecting visitor attention with contextual digital feedback.
- Conducted user research using a service design approach to understand visitor needs and design an inclusive, engaging museum experience.

EXPERIENCE

Experience Design Intern, TCS Research & Innovation, TRDDC, Pune June 2026 - July 2026

- Conducted strategic design research for the **Future of Museums** initiative, exploring AI, emerging technologies and experience design for cultural institutions.
- Applied **service design methodologies** including stakeholder mapping, journey mapping, service blueprinting and systems thinking to identify opportunities across the museum ecosystem.
- Translated research, benchmarking and visitor insights into **experience strategies** focused on accessibility, engagement and interpretation.
- Designed **technology-enabled service interventions** connecting physical artworks with digital experiences to create seamless visitor journeys.

Intern, Pune Design Festival, Mumbai November 2025

- Supported marketing and promotions, coordinated talks and assisted with VIP and speaker management while gaining exposure to the operational and strategic aspects of large-scale design events.

Freelance Architect July 2023 - February 2025

- Created visualizations and 3D models of designs.
- Designed and executed residential projects, developed detailed working drawings and coordinated with clients and site teams for smooth implementation.
- Designed the interior work for several commercial and residential projects.

Architectural Intern, Kapoor and Associates, Patna July 2022 - November 2022

- Worked on government and institutional projects through site visits, case studies, and research.
- Supported planning, budgeting and scheduling across projects.
- Created presentation drawings and 3D visualizations for stakeholder communication.

ACHIEVEMENTS & VOLUNTEERING

- **Research Poster Selected — India HCI 2026, IIT Hyderabad** September 2026
  Selected for presentation in the Posters and Demos track at the 17th Indian Conference on Human-Computer Interaction
- **Finalist — Student Service Design Competition 2026, ServDes India Chapter** September 2026
  Project *Sahaay Care System* shortlisted for the final round
- **Research Paper Selected — ICoRD 2027** August 2026
  Selected for the 11th International Conference on Research into Design, IISc Bengaluru
- **Research Poster Presenter — EMERGE 2026, IIT Bombay** March 2026
  Presented work on Product Design and Innovation at IDC School of Design
- **Research Paper Presenter — NSRC 2.0** February 2026
  Presented research on AI integration in spatial design
- **Volunteer — NIFT International Conference 2026** January 2026
  Contributed to spatial planning, installations and wayfinding systems
- **1st Prize — App Reimagination Challenge** September 2025
  Designed *Boolingo*, an AR-based immersive language learning experience using spatial interactions and storytelling

SOFTWARE SKILLS

Design Tools: Figma, Adobe XD, Adobe Illustrator, Adobe Photoshop, Adobe After Effects

Game Engines: Unreal Engine, Snap Lens Studio

3D & Visualization: SketchUp, Lumion, Enscape, AutoCAD

Research and Strategy: Design Research, Human-Centered Design, Insight Synthesis, Literature Review, Case Study Analysis, Trend Analysis

Other Tools: ChatGPT, NotebookLM, Microsoft Office Suite, Google AI Studio.
